Hazardous Material/Waste Disclosure

If hazardous materials are associated with this project, additional requirements may apply; these can be incorporated into this plan review to save you time and money in the plan check and inspection process. Please indicate below whether hazardous materials are included. **Failure to provide accurate information may result in additional time required to review your project, and may delay the issuance of your Certificate of Occupancy.** Examples of hazardous materials include: solvents, oils, lubricants, fuels, caustics, acids, flammable liquids, poisons, toxics, exotic metals, oxidizers, hazardous wastes, acutely hazardous materials and compressed gases.

**If you have questions, please contact the
Hazardous Materials and Environmental Services Unit at
(408) 586-3365**

- YES**, hazardous materials will be used (Examples of projects qualifying for a “YES” answer: ducting connected to treatment systems, piping and/or equipment utilizing/storing hazardous materials, chemical buildings/storage areas, etc.).
- NO**, hazardous materials will **NOT** be used in the scope of this project.
