The Milpitas Municipal Code Section II-1-18.02 Submittal Documents under Title II Building Regulations reads in part;

“The Chief Building Official may require the construction documents to be prepared and designed by an engineer or architect licensed by the state to practice as such even if not required by state law.”

Per this municipal code section, the Chief Building Official (CBO) stipulates that a California registered Civil or Structural Engineer or Architect licensed to practice in the State of California shall design all hillside residential and commercial structures. Said design professional shall provide all stamped and signed structural drawings.
