

KLA-Tencor is engaged primarily in the design, manufacture and marketing of process control and yield management solutions for the semiconductor and related nanoelectronics industries. Main area of focus is to provide defect inspection and metrology tools, related service and software to assist integrated circuit manufacturers to improve their fabrication and development processes.

Principal functions at headquarters site include R&D and company support functions. Manufacturing is also held on site.

KLA-Tencor headquarters campus FAR increase is planned to accommodate additional space for existing R&D business processes at the Milpitas site. First floor spaces in the preliminary build-out proposal are reserved for laboratories, clean rooms and site service improvements in form of fitness center and cafeteria expansion. Upper floor area may include laboratories, and will be utilized for office use, while also providing supporting conference, collaboration and break space. The operations of the facility are anticipated to remain unchanged.
