Streamlined Permitting Process

New iPad application for inspectors

Implementation of new inspection application on iPad. This new application allows the inspectors to directly enter the inspection results in the permitting system on the iPad and email the results to the contractors immediately at the job site. This improves our inspection and communication efficiency.

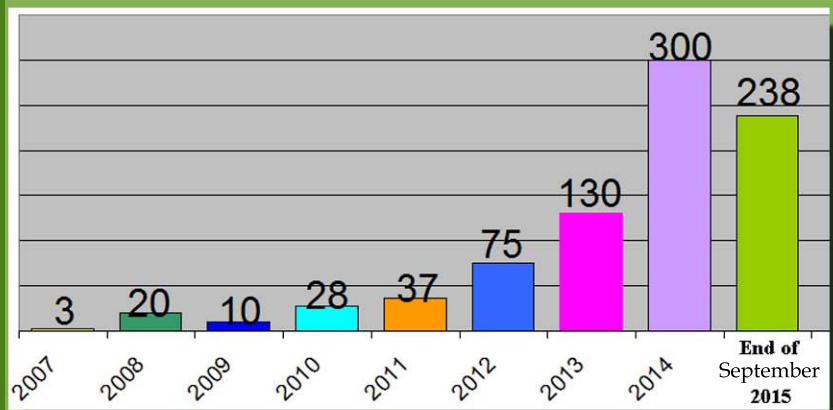

Pre-Filled Permit Application

The permit center can now print out application forms with all contact information pre-filled for any previously visited customers.

Significant increase in number of Solar Panel permits
